\$9.95

Product Images

Short Description

This latching on/off vandal switch cable assembly is the ideal for modding enthusiasts that have a vandal switch and cathode inverter but need a cable assembly to control it. This cable is for 22mm Latching Style (ON/OFF) Vandal switches and is meant to plug in one Molex to the PSU and the other to the inverter you want on the other end.

Description

This latching on/off vandal switch cable assembly is the ideal for modding enthusiasts that have a vandal switch and cathode inverter but need a cable assembly to control it. This cable is for 22mm Latching Style (ON/OFF) Vandal switches and us meant to plug in one Molex to the PSU and the other to the inverter you want on the other end. Switch LED will light when on and go off when switch is off.

Note: Price is for bare cable only. This cable will require you to solder the 4 wires on the vandal switch for a professional look. Choice of pre-soldered switch, cable sleeving and heatshrink can be chosen below.
