

Monsoon Premium G 1 / 4 Temperature Plug - Red

\$8.95

Product Images

Short Description

Designed for Monsoon MMRS reservoirs and Monsoon Light Port Rotary Fittings, or any G 1 / 4 port you want to use to monitor fluid temperature. Install probes at multiple points along your loop for precise metrics on how certain components are impacting cooling efficiency—how much heat a CPU block is adding and a radiator is removing for example. High performance machines with high performance cooling systems deserve high performance monitoring solutions.

Description

Designed for Monsoon MMRS reservoirs and Monsoon Light Port Rotary Fittings, or any G 1 / 4 port you want to use to monitor fluid temperature. Install probes at multiple points along your loop for precise metrics on how certain components are impacting cooling efficiency—how much heat a CPU block is adding and a radiator is removing for example. High performance machines with high performance cooling systems deserve high performance monitoring solutions.

Features

- Industry standard G 1 / 4 threads.
- Ships sleeved with high quality triple strand/triple weave sleeving.
- Uses a 10K Ohm @ 25° C sensor for broad bay device compatibility.
- Plug body is machined from solid brass.
- Probe is high quality stainless and is thermally broken from the plug body for more accurate fluid temperature readings.
- Knurled for easy tool free installation.
- Cable is 50cm (20")
- Available in all 10 Monsoon color finishes for color matching with our full line of compression and rotary fittings.
- Ships with high quality UV color matched 2.4 mm thick silicone O-rings.

Additional Information

Brand	Monsoon
SKU	MON-TPL-RD
Weight	0.1500
Fitting Type	Temp Sensor
Fitting Angle	Straight
