GC20PUSB3.0AF-1 USB3.0 20pin to Dual USB3.0 A Female Adapter

Product Images

Short Description

It's the newest USB3.0 main board solution. As the USB3.0 popularize, more and more main board will support 20PIN (20stitch connector) USB3.0 interface. Through the main board 20pin connector, the user can lead out 2ports USB3.0 interface directly. Now you can use this adapter for the main board 20pin converting to 2ports USB3.0 A type host plug.

Description

Product Details:

It's the newest USB3.0 main board solution. As the USB3.0 popularize, more and more main board will support 20PIN (20stitch connector) USB3.0 interface. Through the main board 20pin connector, the user can lead out 2ports USB3.0 interface directly. Now you can use this adapter for the main board 20pin converting to 2ports USB3.0 A type host plug.
