Short Description

So you just spent all that money on that fancy new SSD and now your gonna hide it in an enclosure or stick it with some velcro to the side of your case? The X bracket is designed to show off that new SSD and give it a solid mount. There are two flavors, a horizontal mount and a vertical mount. Both can hold up to two drives.

Description

So you just spent all that money on that fancy new SSD and now your gonna hide it in an enclosure or stick it with some velcro to the side of your case? The X bracket is designed to show off that new SSD and give it a solid mount. There are two flavors, a horizontal mount and a vertical mount. Both can hold up to two drives.
