

WATERCOOL

Watercool HEATKILLER® microSW-X 40 DIY

\$32.95

Product Images

Short Description

The HEATKILLER ® microSW X-DIY is a universal water cooler for the voltage transformer of the Video Card. Thus it is enough to

cool the voltage converter on suitable graphics card, even if that means no specially adapted water cooler is offered. Other locations are also conceivable. The base plate must be brought up to the individual to self-level and provided with mounting holes.

Description

The HEATKILLER ® microSW X-DIY is a universal water cooler for the voltage transformer of the Video Card. Thus it is enough to cool the voltage converter on suitable graphics card, even if that means no specially adapted water cooler is offered. Other locations are also conceivable. The base plate must be brought up to the individual to self-level and provided with mounting holes.

The base plate has on the basic size 80x30mm.

A heat conduction is recommended. This is not included. Nuts and bolts for mounting are included.

Scope of supply:

- 1x HEATKILLER ® microSW-X 40 DIY
