Short Description

Primochill's ZenCoils™ have been developed to combat the water vortex that some users experience with tube reservoirs. This unique product quietly and effectively breaks up the surface acceleration on the inner wall created by the rush of fluid into the tube reservoir.

Description

Primochill's ZenCoils™ have been developed to combat the water vortex that some users experience with tube reservoirs. This unique product quietly and effectively breaks up the surface acceleration on the inner wall created by the rush of fluid into the tube reservoir. In addition, ZenCoils™ assist in reducing air bubbles that tend to get sucked back into the system as well as those that form in the tube reservoir over time.

Calming the Vortex

Tube reservoirs are often plagued with either a vortex issue or a noise issue because of today's high flow systems. Complex anti-vortex paddles or walls have been designed to help reduce the vortex, however even with this slight obstruction the flow is decreased. The simplicity of the ZenCoil™ results in the calming effect desired with even less obstruction of flow.

Achieving Zen

A wide variety of colors with simple and straight forward installation will get your system to Zen in no time.

Features

- Simple Install
- Fits Any Tube Reservoir
- Zero Flow Impact
- Large Range of Colors
- Low Cost Alternative
- Enough for 2 Small Reservoirs

Specifications

- 0.125in. Thick Coil
- 12in. Coil per package
- Made in the USA
- Virgin PVC
- Environmentally responsible, safe and non toxic product
- ROHS Compliant PVC

Additional Information

Brand	Primochill
SKU	PCC-56-S
Weight	0.3000
Color	Silver
Reservoir Type	Tube Res
Reservoir Accessory Type	Anti-Cyclon
