Short Description

Phobya's innovative new shroud does not only improve cooling performance, it also offers a whole array of new design possibilities for your system!

Description

Phobya's innovative new shroud does not only improve cooling performance, it also offers a whole array of new design possibilities for your system!

Cooling performance:

The shroud increases the cooling performance of your fan/ radiator combination. Mounted between fan and radiator it allows a more even distribution of the Airflow, hence using the whole cooling surface of the radiator. If a fan is mounted on a radiator

directly the fan motor creates a dead-spot which leaves some of the radiator's surface unused, reducing the possible cooling performance. Multiple shrouds may also be used on top of each other using longer mounting screws to increase cooling performance even more.

Appearance:

The appearance of a PC grows more and more important besides the performance of the system. Phobyas has also considered this factor and has made these shrouds from Plexi. If you are using LED fans this allows an interesting and unique effect which will make your system even more of an eyecatcher. Should the luminance from the fan not suffice it is also possible to insert 5mm LEDs in the side of the shroud, bringing the before optically dead space between fan and radiator to life!

Specifications

- Material: Plexi
- Colour: Transparent
- Designed for: 200mm fans
- Dimensions (LxWxH): 200 x 300 x 20mm

Extent of delivery:
1x Phobyas 200x200x20mm shroud Plexi

Additional Information

Brand	Phobyas
SKU	PH-38332
Weight	1.0000
Color	Clear
Radiator Size	200mm
Radiator Accessory Type	Shroud
Material	Acrylic
Vendor SKU/EAN	4049469145033
