

Alphacool Bubble Down G1/4 - Copper

\$5.50

Product Images

Short Description

The Alphacool Bubble Down element serves to prevent turbulence in the reservoir and create turbulence in relief. The sum of many small holes is almost exactly the area of a 1/4 "inch thread, so that the flow will not be reduced.

Description

The Alphacool Bubble Down element serves to prevent turbulence in the reservoir and create turbulence in relief. The sum of many small holes is almost exactly the area of a 1/4 "inch thread, so that the flow will not be reduced.

As applied in many Alphacool containers already this part not only serves as a spare part but can be used also wonderful in most tube or pump Conditions of Use.
