

Thermal Pad 5W/mk 0.5mm (120x20mm) for Ramplex, Innovatek, Mips, Koolance

\$2.49

Product Images

Short Description

These self-adhesive thermal pads are very useful to compensate height differences and other irregularities on coolers and surfaces that are to be cooled. Due to the very elastic adaptability and the low hardness of this pad only little contact pressure is needed to allow perfect adaptation to the surfaces to ensure the best possible heat transfer. With these pads almost any unevenness can be compensated, from microscopically small grooves to visible irregularities

Description

These self-adhesive thermal pads are very useful to compensate height differences and other irregularities on coolers and surfaces that are to be cooled.

Due to the very elastic adaptability and the low hardness of this pad only little contact pressure is needed to allow perfect adaptation to the surfaces to ensure the best possible heat transfer. With these pads almost any unevenness can be compensated, from microscopically small grooves to visible irregularities. The self-adhesive surface of these pads allow easy installation and prevents the pad from shifting during installation of the cooler. These pads were specially produced for RAM cooling but can also be cut to any desired size.

Specifications

Technical data:

- Dimensions: 120x20x0,5mm
- Heat conductivity: 1,5 W/mK
- Maximum bridgeable gap: 0,5mm
- Electrically non-conductive

Extent of delivery:

1x Self-adhesive thermal pad 0,5mm (120x20mm) for ramplex, Mips and Koolance

Note: The thermal pads can be compressed to up to half of their height.

Additional Information

Brand	Phobya
SKU	PH-19041
Weight	0.0100
TIM Type	Pad
Vendor SKU/EAN	4049469054038
