Product Images

Short Description

Product Details:

The MM200's cloth surface delivers excellent glide characteristics that allow you to execute fast swipes and pull off high-precision shots with confidence and consistency.

Optimized for Gaming Sensors

Microscopic variances in the surface affect mouse tracking far more than its visible texture or color. The MM200 uses a carefully-screened surface material that delivers excellent tracking with any gaming mouse sensor.

Stable and Secure

You can't afford to have your mouse surface move in the middle of a firefight, so we added a 1.5mm no-slip base that provides cushion with just the right amount of give. And it's made of natural rubber, so it doesn't have a harsh chemical odor.

Glide-Optimized Textile Surface

Tuned for smooth, fast movement with excellent control

Designed for Gaming Mouse Sensors

Make consistent, precise shots with optical or laser gaming mice

Non-slip Natural Rubber Base

No bunching or sliding - even during intense gaming

Specifications:

- Warranty: One Year
- Dimensions: 265mm x 210mm x 2mm
