

Watercool Heatkiller Dual DDC-Case LT Acryl

\$45.95

Product Images

Short Description

The Dual DDC-Case LT provides maximum performance to the user. It almost doubles the already very good performance of the Laing DDC pump by mounting two pumps serially. The whole cooling system may benefit from the increased pump performance.

Description

The Dual DDC-Case LT provides maximum performance to the user. It almost doubles the already very good performance of the Laing DDC pump by mounting two pumps serially. The whole cooling system may benefit from the increased pump performance.

Aside from the option of using two pumps, the Dual DDC-Case provides G1/4" threads to allow use of

conventional fittings. The inlet may be either on the side or on top. The Dual DDC-Case is made from cast acrylic glass (PMMA) with a cover made from stainless steel.
