Short Description

The Level 10 concept allows gamers to experience the power of their high-end computers through the design itself. In order to achieve this, iconic design is combined with optimum functionality and innovative details.

Description

Product Details:

The Level 10 concept allows gamers to experience the power of their high-end computers through the design itself. In order to achieve this, iconic design is combined with optimum functionality and innovative details.
The inspiration for this approach the design team took right from the computer worlds themselves – expressiveness, virtual townscapes and futuristic game components served as orientation for the arrangement and the display of individuality. These appear within the overall design in the form of an open modular and configurable structure that visually appeals to users, offering them additional functional as well as pleasurable benefits.

Features

Design concept

The concept is inspired by the attention of gamers to expensive, top performance professional gaming mouse and their exquisite taste and appreciation for Level 10 aesthetics.
By transferring the previous design success of the Level 10 chassis onto gaming peripheral, Level 10 M Gaming Mouse is the first Level 10 gaming peripheral product aiming to extend the Level 10 experience to directly interact with the users. Its emotional design strongly enhances the overall gaming excitement, and that design serves as the agent between gamer and the game, functions as the experience itself.

Designing for the Best: BMW Group subsidiary DesignworksUSA and the Level 10 M Mouse

For the Level 10 project Thermaltake wanted a design partner which stands for innovative thinking and revolutionary approaches in design. Right from the beginning therefore, DesignworksUSA has been the design partner for the Level 10 project. The global design consultancy has skillfully extended the Level 10 design concept and translated it to a vital gaming accessory: the Level 10 M Mouse.
Working in various industries, the design team is able to transfer visions and inspiration between many projects and has successfully demonstrated this ability in the latest Tt eSPORTS product design. With the Level 10 M Mouse Thermaltake presents a product which was inspired by the leading future thinkers. The collaboration between Thermaltake Group and BMW Group subsidiary DesignworksUSA will be continued and with an extended e-Sports product range it will keep its focus on serving the high demands of our customers.

Air-Through Ventilation

This ventilation solution strengthens the possibility of a better air and temperature exchange as a means of passive ventilation. Through the perforated surface, issues such as heavy use of the Level 10 M Mouse and the rise of temperatures of the hand are significantly reduced.

3D Steering

Level 10 M Mouse is designed with open structure in between top and base segments, and the space in between the mouse also serves to adjust the height and angle via steering axis, greatly enhance user comfort and convenience as well.

Intelligent Software

Level 10 M Mouse is a programmable gaming mouse capable of using the most comprehensive software application to customize settings based on gamer's needs. Specifically, the Z key can be programed to switch up to 5 gaming profiles. Other features such as the polling rate and the 7 lighting-effect colors are also customizable through software, making Level 10 M Mouse a truly amazing mouse for pro-gaming and creative needs.

Dynamic Color Range

Up to 7 colors to choose from, the Level 10 M Mouse allows gamers to build up personal gaming atmosphere. Notably, a breathing Battle Dragon can be found underneath the perforated surface!

Aluminum Base

Aluminum base is one of the toughest chemical materials with character of high resistance to corrosion, and commonly used in aerospace industry and architectural purpose. Level 10 M Mouse is designed with solid aluminum material to ensure both durability and tenaciousness are constantly experienced by the users over Level 10 M Mouse's quality and long-lasting durable experience.

Laser Sensor

Level 10 M Mouse is equipped with 8200 DPI, adjustable from 800, 1600, 3200 to 5000 (default setting), and customizable by software application up to 8200 DPI. With the LED indication on top of the mouse, gamer is constantly and visually informed with the current DPI status, and to make change wherever necessary.
