

PrimoChill Intensifier Transparent Fluid Dye - UV Brite Green

\$8.95

Product Images

Short Description

PrimoChill Intensifier™ coolant dyes have been carefully reformulated into smaller batches to insure the highest quality and consistency from batch to batch. Each batch is “Intensely” inspected and tested for consistent color, signs of contamination that may have occurred during the manufacturing process, effects of temperature extremes, and any sign of degradation.

Description

PrimoChill Intensifier™ coolant dyes have been carefully reformulated into smaller batches to insure the highest quality and consistency from batch to batch. Each batch is “Intensely” inspected and tested for consistent color, signs of contamination that may have occurred during the manufacturing process, effects of temperature extremes, and any sign of degradation. This vigorous testing is performed in a real world environment with the latest cooling hardware.

Over the last decade, PrimoChill has strived to provide the water-cooling community quality products that inspire our customers. Intensifier™ Coolant Dyes are the next generation of cool. Get Creative!

Features

- MAKES 1 GALLON OF COOLANT: 15ml of "Intense" concentrated dye in a dropper bottle for precise control of dispensing.
- Formulated to provide the most "Intense" and vivid colors possible with "intense" quality inspection.
- Strongest, Most Powerful Industrial Dyes but still clean and pure with no special additives.
- Environmentally responsible safe and non toxic product.
- Safe on all plastics, rubbers, and miscellaneous gasket materials
- Each Bottle is labeled with a batch date to insure freshness.
