Short Description

Product Details:

Introducing the Logitech *Bluetooth* Illuminated Keyboard K810 for Windows®, Android® and iOS®—a stylish, backlit keyboard with one touch easy-switching between your PC, tablet, and smartphone.

Features:

Laser-etched backlit keys

Type easily in low light and even in the dark. Back lighting ensures the keys are sharp, bright and always easy to read in any light. Only the key characters are illuminated, so you see just what you need to see without distraction.

Auto-adjusting illumination

The illumination automatically adjusts to suit the light conditions in the room. You can also manually adjust the brightness of the illumination using the F5 and F6 keys.

Hand proximity detection

A motion sensor detects your hands as they approach the keyboard and turns the backlight on/off to help you save power when you are not typing.

Logitech Easy-Switch™

Press one button to switch in a second between your Bluetooth devices. Logitech Easy-Switch allows you to quickly toggle between typing an email on your Windows® PC, to taking notes on your Apple® iPad®, to replying to a text on your Android™ smartphone.

Reliable *Bluetooth* connection

Pair the keyboard with your PC, tablet and smartphone easily over *Bluetooth*. The fast, reliable connection allows you to move and type on the keyboard anywhere within 30 feet (9 meters) of your *Bluetooth* devices.

Simply stylish

The keyboard case is real, brushed aluminum with a high-grade finish to complement the design, look and feel of today's trendiest PCs, Ultrabooks™, tablets and smartphones.

Sleek and ultra-thin

With sleek lines and low-profile keys, this slim keyboard will be an elegant addition to your workspace.

Compact and wireless

The minimalist, cable-free design takes up much less space on your desk than a full-size keyboard. It also means you can take your keyboard wherever you go with your Ultrabook, tablet or smartphone.

Designed for Windows 8, compatible with Android and iOS®

This keyboard has specific keys to help you easily navigate the new Windows 8 style user interface. The Windows 8 Start key provides an easy way to get back to your start screen. The App Switching FN key allows you to quickly toggle between your open apps. Although it was specially designed for Windows 8, this keyboard also works well with Windows 7, iOS and Android operating systems.

USB rechargability

Forget about having to change batteries. With USB rechargability, you'll never run out of power. Easily top up your keyboard with the convenient USB cable and continue to work. You'll enjoy between 10 days* and up to a year of power, depending on the intensity of illumination and time spent typing.

Power management

On/Off switch on the right side panel helps you conserve power when the keyboard is not in use. There is also a battery indicator light which turns red when you need to power up and green when the keyboard is charging.

Logitech Incurve™ keys

Type comfortably thanks to the unique Logitech keycap design. The concave key surface complements the natural profile of your fingertips and helps you better locate each key for an improved typing experience. The key edges are also softly rounded so your fingertips glide smoothly from key to key.

Logitech PerfectStroke™ key system

The PerfectStroke key system distributes typing force evenly across the key surfaces making every keystroke silent, natural and fluid—even if you strike the edge of a key.

Specifications:

Works with:

- *Bluetooth* capable PC, laptop, tablet or smartphone (tablet or smartphone with keyboard profile HID)
- Windows® 7, Windows 8, or Windows RT
- iPhone® or iPad®, iPad 2, iPad (3rd and 4th generation), iPad mini® with iOS® 4.0 or later
- Android® 3.0 or later

Package Contents:

- *Bluetooth* Illuminated Keyboard
- USB recharge cable
- User documentation
