## Description

---

EK-DCP 2.2 X-RES is Combo Reservoir Unit for EK-DCP 2.2, small but powerful 12V DC pump. This product though does NOT include the DCP Pump! The product is a direct successor of EK-Reservoir Combo DCP 2.2. This reservoir does not serve as a standalone unit and can only be used with EK-DCP 2.2 water pump!

EK-DCP 2.2 X-RES is a compact, easy to use water pump/reservoir combo unit. Base and top of reservoir is made of quality POM Acetal while the clear tube is made of quality casted acrylic material. The reservoir has build-in port for installation of EK-DCP 2.2 water pump. This reservoir is fully air- and waterproof once closed with the enclosed plugs therefore no water can evaporate.

This reservoir also features vibration dampening rubber mounting system which effectively silents your computer, the classic metal mounting plate is also enclosed.

This reservoir does not serve as a standalone unit and can only be used with [EK-DCP 2.2 12V DC water pump](#). This pump is the ideal solution for all enthusiast built water cooling systems and is compatible with all standard water cooling system setups. The EK-DCP 2.2 will can achieve up to 400L / hour with its compact, powerful, low-noise and extremely reliable design.

**DCP MUST BE Purchased separately.**
