## Short Description

## Product Details:

GT80N Super Multi Slim Internal DVD Rewriter with M-DISC™ Support. Features max 8x DVD-R writing speed, M-Disc™ support, SATA interface, and Zerpower ODD support.

### 8x DVD-R Writing Speed

Burn more discs in less time with 8x DVD-Max writing speed.

### Standard DVD-R

Superior data protection with M-DISC™ Support

The M-DISC™ uses a patent rock-like recording surface instead of organic dye to etch your data onto a disc. The M-DISC has been tested and proven to outlast standard DVDs currently on the market.

### Zerpower ODD Support

Zero-Power Optical Disk Drive (ODD) eliminates the power consumption of an idle SATA ODD, resulting in increased energy savings

### SATA

Serial ATA is a 1.5Gbps evolutionary replacement for the Parallel ATA physical storage interface used to connect storage devices, such as hard disks, DVD and CD rewriters to the PC motherboard. Serial ATA is scalable, enables design of smaller PCs, and will allow future enhancements to the computing platform.
