Short Description

CT40N super multi slim Internal BluRay drive with M-DISC™ support. Features 6x BD-ROM reading & max 8x DVD-RW writing speed, M-Disc™ support, SATA interface, and Silent & Jamless Play.

Description

CT40N super multi slim Internal BluRay drive with M-DISC™ support. Features 6x BD-ROM reading & max 8x DVD-RW writing speed, M-Disc™ support, SATA interface, and Silent & Jamless Play.

Features

6x BD-ROM Reading and Max 8x DVD-RW writing speed

Capture all the excitement of Blu-ray with the 6x BD-ROM reader that offers for smooth playback. Plus, burn more discs in less time with 8x DVD-Max writing speed.

2D-TO-3D Real-time converting

Converting 2D-to-3D is easy with real-time conversions of DVD titles and any file based videos. And because it can be transformed in real-time there's no waiting for you to enjoy the 3D viewing.

Superior data protection with M-DISC™ Support

The M-DISC™ uses a patent rock-like recording surface instead of organic dye to etch your data onto a disc. The M-DISC has been tested and proven to outlast standard DVDs currently on the market.

Play in peace

As a disc is being read, Silent Play technology automatically controls the disc read speed for optimal noise reduction.

Nonstop playability

Jamless Play automatically prevents stop video playback in case of damaged disc, such as scratches or fingerprints by jumping through the erroneous data or damaged areas.

Zeropower ODD Support

Zero-Power Optical Disk Drive (ODD) eliminates the power consumption of an idle SATA ODD, resulting in increased energy savings

SATA

Serial ATA is a 1.5Gbps evolutionary replacement for the Parallel ATA physical storage interface used to connect storage devices, such as hard disks, DVD and CD rewriters to the PC motherboard. Serial ATA is scalable, enables design of smaller PCs, and will allow future enhancements to the computing platform.
