Short Description

To achieve superior CPU cooling, you can count on NZXT's award-winning HAVIK series to rid of all your heating issues. In comparison to the HAVIK 140, the HAVIK 120 is compact offering more versatility. This 120mm CPU cooler is perfect for overclockers seeking a small yet powerful fan cooler. The base is composed of nickel-plated copper material that utilizes four 8mm pipes for transferring heat to aluminum fins. This allows more air to reach the heatsink which keeps temperatures low while increasing longevity of your components. HAVIK 120 is a victory for any enthusiast looking for an inexpensive and high performing silent CPU cooler.
