Short Description

NZXT has expanded their bay devices with HUE; an LED configuration that is customizable to your liking. HUE grants you the power to select how you want to illuminate your chassis with infinite possibilities. Take charge of the RGB controls to adjust the color fade, pulsating light effects, and brightness levels of your internal LED sleeve.

Description

RGB Color Changing LED Controller

NZXT has expanded their bay devices with HUE; an LED configuration that is customizable to your liking. HUE grants you the power to select how you want to illuminate your chassis with infinite possibilities. Take charge of the RGB controls to adjust the color fade, pulsating light effects, and brightness levels of your internal LED sleeve. HUE is equipped with an on/off mode for times you may need to go stealth and possesses a unique semi-mesh design, blending flawlessly into any chassis with a mesh front panel.

Features

- Infinite color options that you can customize to your heart's content
- Three RGB controls to adjust the color settings, brightness level, and pulse speed of the internal LED sleeve
- On/off mode to completely disable the LEDs
- Effect modes: normal, fading, flashing, and pulsating of colors
- Internal LED sleeves that vibrantly illuminates and accents your chassis based on your liking
- Unique mesh design that blends flawlessly into any chassis with a mesh front panel
