Short Description

EK-HD Tube is a multiple VGA water blocks connectivity set consisting of a pair of pre-cut solid Acrylic tubes. In conjunction with [EK-HD Adapter](#) fittings this EK-HD Tube set can be used as an alternative solution for connecting multiple full-cover GPU water blocks (SLI/CrossFireX).

Description

EK-HD Tube is a multiple VGA water blocks connectivity set consisting of a pair of pre-cut solid Acrylic tubes. In conjunction with [EK-HD Adapter](#) fittings this EK-HD Tube set can be used as an alternative solution for connecting multiple full-cover GPU water blocks (SLI/CrossFireX).

EK-HD Tube 2-Slot type is intended for use with PCI-Express slots 40.6mm (1.6" apart).

Made in Slovenia - EU!

For easier installation we recommend wetting the gasket (o-ring) using drops of water prior to installing solid tube.

Important: These pre-cut tubes are suitable for SLI/CrossFireX connection of modern EK Full Cover water blocks using EK-FC Terminal only! In case of different version (pre-CSQ, CSQ) of water blocks one needs to purchase a longer tube and cut it by himself. It is mandatory to chamfer the edges of freshly cut tube in order to prevent gasket (o-ring) damage. EK recommends a 0,5mm x 45° chamfer.

Specifications

Technical data:

- Inner diameter: 10 mm
- Outer diameter: 12 mm
- Length: 20.70 mm

The package contains 2 pieces of tube only. Please purchase EK-HD Adapter fittings separately!
