

Phobya 16/13mm Straight Bulkhead Fitting - Knurled - MSV

\$3.99

Product Images

Short Description

High-grade robust brass bulkhead fitting. Ideal to create an optically appealing and functionally matured connection between inside of the case and an external cooling loop. With the two included counter-nuts the bulkhead fitting can be fixated safely. Only a suitable hole must be drilled. Then simply insert the fitting and fixate it with the counter nuts - done! This fitting can also be used to easily connect a separated piece of tubing: Simply connect each end to one of the compression fittings and fixate the tubing.
