## Short Description

3M Thermally Conductive Adhesive Transfer Tapes - 80 x 80mm

## Description

3M Thermally Conductive Adhesive Transfer Tapes - 80 x 80mm

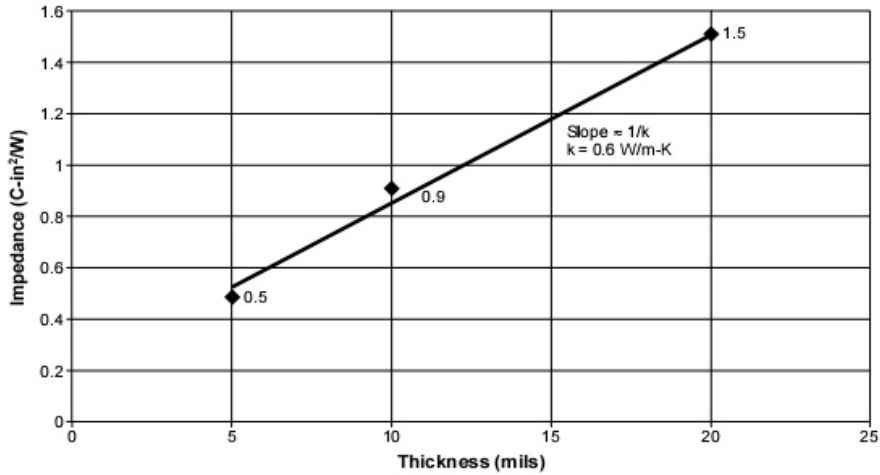

# 3M™ Thermally Conductive Adhesive Transfer Tapes

8805 • 8810 • 8815 • 8820

**Typical Properties and Performance Characteristics**  
(continued)

**Note:** The following technical information for 3M™ Thermally Conductive Adhesive Transfer Tapes 8805, 8810, 8815 and 8820 should be considered representative or typical only and should not be used for specification purposes.

**Thermal Impedance (C-in<sup>2</sup>/W) vs. Thickness: (Test Conditions: 3M test method).**

## Product Construction

| 3M™ Thermally Conductive Adhesive Transfer Tapes |   |                   |                    |                   |
|--|---|-------------------|--------------------|-------------------|
| Product Number                                   | 8805  | 8810              | 8815               | 8820              |
| Color  | White   |                   |                    |                   |
| Tape Type  | Filled Acrylic Polymer  |                   |                    |                   |
| Tape Thickness                                   | 5 mils (0.125 mm)   | 10 mils (0.25 mm) | 15 mils (0.375 mm) | 20 mils (0.50 mm) |
| Filler Type                                      | Ceramic   |                   |                    |                   |
| Liner Type                                       | Dual liner using silicone-treated polyester.<br>Easy release PET liner is clear in color, tight side PET liner is blue in color |                   |                    |                   |
| Liner Thickness                                  | 1.5-2 mil (37.5-50 µm) thickness for inside or outside wound liner.   |                   |                    |                   |
