## Description

The variable SLI connection piece connects two VGA waterblocks which are operated in a system in SLI mode . The special of this piece is that it approximately 12mm in length is adjustable . Therefore, this connector can be used with graphics cards from different manufacturers. The nipple can be used to either turn the graphics cards in a row , or if you put 2 nipples between 2 graphics cards , both coolers can be durchströmt parallel. This is of course also possible with 3 graphics card coolers . The connector pieces are available in 3 lengths:

Article 94248 for 1 slot  
Article 94249 for 2 slot  
Article 94250 for 3 slot motherboards.

## Specifications

---

- A direct connector between 2 graphics cards .
- Thread: G1 / 4 inch Material : Brass nickel plated
- Distance between the radiators : 59.5 to 70.9 mm
- Suitable for motherboards with 1 slot spacing between the two graphics cards.
