\$49.95

Product Images

Short Description

MNPCTech produces some of the finest machine billet products in the market and these are no exception! Very few case handles make a statement when seen like these do! These medium large anodized case handles are designed to meet practicality transforming your computer into a unique carry case. These handles make it easier to transport your case around to any event including LAN parties. The machine billet handles are made of premium anodized aluminum and are carefully CNC milled. Made from sturdy 3/4" thick solid aluminum, these wonderfully grooved handles are optimally suited for anyone who regularly picks up and moves their cases.
