

# Aquacomputer Bushing Housing Slot Bracket with Two Connections G1 / 4 - Two-Piece

\$22.95

## Product Images

## Short Description

---

This elegant housing bushing for a free PCIe or PCI slot enables the safe execution of two refrigerant pipes (flow and return), without making any holes. Package lead consists of a stainless steel slot bracket with two integrated Delrin connection parts. The connection threads are running on both the housing exterior and on the inside in G1 / 4.

## Description

---

This elegant housing bushing for a free PCIe or PCI slot enables the safe execution of two refrigerant pipes (flow and return), without making any holes. Package lead consists of a stainless steel slot bracket with two integrated Delrin connection parts. The connection threads are running on both the housing exterior and on the inside in G1 / 4. The two Delrin connection parts are sealed from each other with two O-rings. The external thread G1 / 4 make it possible directly into the slot bezel Couplings 90108 or 90109 (both not included) to be screwed. The design is additionally obtained a very good strain relief for the internal water circuit of the PC.

## Specifications
