## Short Description

---

The Petit PT14 is designed to be one of the smallest computer chassis for Intel Next Unit of Computing (NUC) platform. It measures only half a liter in size while accommodating an Intel NUC motherboard. Inside the PT14's aluminum top cover, SilverStone added a heat-pipe for better heat conducting efficiency to enable

optional fanless operation. On the bottom, there is also an included 60mm PWM fan to provide extra cooling performance or thermal protection. Complementing this impressively small case are a VESA mounting bracket and wall mount kit to help PT14 fit in nearly any environment.
