Short Description

SilverStone Technologys Nitrogon NT07-115X is a super slim profile CPU cooler designed for space limited applications that utilizes LGA 1156, 1155, or 1150 platforms. It has a copper center construction with extruded aluminum fins for excellent thermal conductive capability that rivals many larger coolers. The

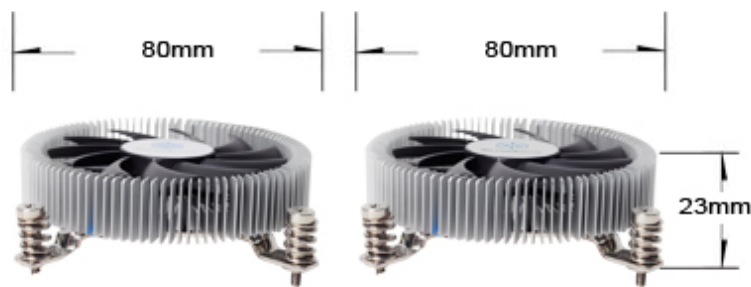

custom 80mm PWM fan was designed with fan blades to achieve the highest air pressure possible while maintaining an acoustic profile that is rare for cooler of this size. At a total height of only 23mm tall, the NT07-115X is an essential choice for super slim cases such as SilverStone Petit PT12 or PT13 utilizing LGA 1156, 1155, or 1150 processors.
