Short Description

Its unique design gives extraordinary qualities to the HEATKILLER® GPU-X³. Its hallmarks are low height, state of the art cooling performance, and highest quality of material.

Description

Its unique design gives extraordinary qualities to the HEATKILLER® GPU-X³. Its hallmarks are low height, state of the art cooling performance, and highest quality of material.

All water carrying parts of the cooler are made from pure electrolytic copper or stainless steel, and the connection block is made from black POM. The top is protected against staining by a special clear varnish. The design of the “Hole Edition” features a perforated cover plate.

Aside from the GPU, memory and voltage regulators are cooled. An extremely fine microstructure sits right above the GPU and guarantees, assisted by a low residual base thickness, optimal cooling performance. Integrated isolating stand-offs allow easy mounting of the cooler.

To reduce flow resistance and overall weight, all channels are constructed as wide as possible. Threads on both sides of the connection block ease integration into the cooling loop.

Dual- and triple-connectors for SLI-setups are available.

For easy installation, pre-cut thermal pads are included.

Specifications

- Material: Electrolytic copper, stainless steel, POM
- Dimensions (L x W x H): 188.5 x 118.0 x 9.5 mm
- Weight: approx. 900 g
- Threads: 4x G ¼” (DIN ISO 228-1)
- Pressure tested: 5 bar
- Compatible to: Nvidia GTX TITAN (reference PCB), Nvidia GTX 780 (reference PCB), Nvidia GTX 780 Ti (reference PCB)

Included:

- 1x HEATKILLER® GPU-X³ GTX TITAN/780/780Ti LT
- 1x Installation material/manual

Additional Information

Brand	Watercool
SKU	WC-13122-D
Weight	2.5000
Color	Silver
Vga	Titan/GTX780/780Ti
Block GPU Type	Nvidia
Block Style	Copper
Special Price	\$74.95
