## Short Description

ModMyToys 4-Pin PWM Power Distribution PCB is the perfect organizational solution for hard core modder's,

water cooling enthusiasts and other power users that use a large amount of cooling fans in their systems or servers. Why use clumsy Y splitters that just add to cable clutter when you can have a clean point to distribute power to all your 4-pin PWM fans? These small PCB's are made of the highest quality and include and easy to install preinstalled black mount rail and Velcro strip.

ModMyToys 4-Pin PWM Power Distribution PCB is the perfect organizational solution for hard core modder's, water cooling enthusiasts and other power users that use a large amount of cooling fans in their systems or servers. Why use clumsy Y splitters that just add to cable clutter when you can have a clean point to distribute power to all your 4-pin PWM fans? These small PCB's are made of the highest quality and include and easy to install preinstalled black mount rail and Velcro strip. This allows you to mount virtually anywhere in your case including all those hidden places modder's like to route their cables to. For those that want the best look these have a black PCB and connectors. So, eliminate all those extra cables and install the ModMyToys 4-pin PWM power distribution PCB to be a Pro!

Please note for a PWM signal to work properly fan to motherboard you should match and only use the same PWM fan models on the same PCB. Do not mix fans or there will be mixed signals.

These Power Distributors need a Female to Female PWM with only the RPM and PWM leads attached going from the PCB to the MotherBoard PWM Header to controll the PWM function.(Image of cable listed below)
