

# Monsoon Hardline Lock Collar Conversion Kit - 1/2" OD (13mm)

\$2.99

## Product Images

## Short Description

This kit allows you to convert your existing Monsoon Premium compression fittings for soft tube over to acrylic hard lines. The antimicrobial silver bases replace the tube barbs in your existing fittings--saving you about half the cost of buying new fittings!

The kit includes antimicrobial silver bases, acrylic lock collars, and premium silicone seals to convert your 3/8" x 1/2" Free Center, Chain Gun, or Carbon premium compression fittings for soft tube over for use with Monsoon Hardline 1/2" OD (13mm) acrylic tube.

## Description

## Features

---

- Bases are precision machined entirely from marine grade brass.
- Antimicrobial silver barbs/bases.
- Modular--fully interchangeable between fitting styles and across tube types.
- Industry standard G 1/4 threads and highest quality premium silicone O-rings and seals.
- Barbs/Bases have knurled bottoms to grip blocks better. See pictures for details.
- Includes 2 O-rings and 2 seals per fitting.
- Available for two tube sizes--3/8" X 1/2" (13mm) and 1/2" x 5/8" (16mm).

### INCLUDED IN SINGLE PACK:

- One antimicrobial silver barb/base.
- One molded acrylic lock collar.
- Two black 2.4mm thick high quality silicone G1/4 BSPP O rings.
- Two molded premium silicone lock collar seals.

### INCLUDED IN SIX PACK:

- Six antimicrobial silver barbs/bases.
- Six molded acrylic lock collars.
- Twelve black 2.4mm thick high quality silicone G1/4 BSPP O rings.
- Twelve molded premium silicone lock collar seals.
- Free Wrench.

## Specifications

---

### PLEASE NOTE:

The Hard/Lock capabilities of this fitting do not work the same way traditional push in type fittings do and require an additional step. Although they are not difficult to install, we highly recommend you watch the video linked below BEFORE you make this purchase.

### WARRANTY:

*Guaranteed against manufacturing defects for one (1) full year from your date of purchase. This warranty does not include customer damage to the finish or the product itself caused by over tightening or incorrectly applied tool force or use of fluids containing any abrasives or glycol. Water cooling has an inherent risk of damage to your computer parts from improperly selected or installed components; therefore, Monsoon is not responsible for any damage that might arise from the use of these products.*

We recommend leak testing your loop outside of your system for at least 24 hours.
