## Product Images

## Short Description

---

Scythe GlideStream 140 PWM series combines the proven "small hub & wide blade" design concept with neat, new ideas: Grooved fan blades contributing to even less air resistance, and mounting holes fitted with rubber inlays in order to minimize unpleasant vibration noise.

## Description

---

The Scythe GlideStream 140 PWM combines the proven "small hub & wide blade" design concept with neat, new ideas:

Grooved fan blades contributing to even less air resistance, and mounting holes fitted with rubber inlays in order to minimize unpleasant vibration noise. Another unique characteristic are the 120 mm mounting holes resulting in high airflow while keeping the noise to a minimum.

## Features

---

### NEW - special fan blades

In order to keep air resistance to a minimum, the fan blades have been fitted with unique grooves - these contribute to even less air resistance, optimizing the airflow.

### Anti-Vibration-System

All fans of this series have the mounting holes fitted with rubber inlays to keep unpleasant vibration noise at a minimum.

### Designed for 120 mm Screw Hole Compatibility

The 140 mm GlideStream fans are fitted with mounting holes suitable for 120 mm dimensions. This is achieved by the unique "rounded corners" resulting in high airflow combined with low noise.

### PWM-Function

The pwm-model (Pulse-width modulation) of the new GlideStream-series. By using a pwm-capable motherboard, this fan can be controlled automatically. This function allows a more flexible rpm regulation, making it more convenient for the user. With the included adaptor, the Grand Flex 120 PWM can also be used without making use of the pwm function.
