## Product Images

## Short Description

---

The Black Ice® Nemesis® 120GTS® XFlow steps up to the challenge for high performance for single-fan stealth form factor PC radiators. Featuring the Black Ice® Nemesis® GTS® XFlow core platform, this single 120mm fan radiator is able to provide enhance coolant flow and even better performance under low airflow conditions. This gives PC performance enthusiasts more performance for less noise in the same single-fan form factor. Now featuring a vectored cross-flow tank design, overall system flow rates are enhanced for systems using impingement type waterblocks.

October 23, 2014 The Quad Rad Roundup

"Performance should never be the sole metric to base a radiator choice on. In fact, never buy a radiator separately- get the radiator and appropriately chosen fans in terms of airflow, static pressure and noise levels you are comfortable with. "The HWL (Black Ice NEMESIS) rads scale great with airflow while the XSPC RX V3 does not- goes to show that liquid and air flow restrictions don't tell everything and the entire package can affect things. The Nemesis series was optimized for scaling and it has showed to be the case in here." -Varun S. Gangoli. Read the whole review [HERE](#).
