Short Description

The Black Ice® Nemesis® 420GTS® XFlow renders best in class quality and performance for the discriminating casemod professional. Supercruise optimizations exploit low-noise fans for scaled performance in a low-profile triple triple 140mm fan envelope. A newly designed, vectored cross-flow tank enhances flow through impingement type waterblocks for better performance. This allows professional users a single radiator solution for multi-CPU/GPU implementations that simply fits.

Internet Reviews

October 23, 2014 The Quad Rad Roundup

"Performance should never be the sole metric to base a radiator choice on. In fact, never buy a radiator separately- get the radiator and appropriately chosen fans in terms of airflow, static pressure and noise levels you are comfortable with. "The HWL (Black Ice NEMESIS) rads scale great with airflow while the XSPC RX V3 does not- goes to show that liquid and air flow restrictions don't tell everything and the entire package can affect things. The Nemesis series was optimized for scaling and it has showed to be the case in here." -Varun S. Gangoli. Read the whole review [HERE](#).
