Short Description

The Black Ice® Nemesis® M160GTX® provides next generation scalability for dual-80mm Micro form factor radiators. The Nemesis® M160GTX® now boasts of Supercruise optimizations to give it even more performance in low airflow/noise conditions while maintaining full compatibility with previous dual 80mm Black Ice® Micro form factor radiators.

Description

The Black Ice® Nemesis® M160GTX® provides next generation scalability for dual-80mm Micro form factor radiators. The Nemesis® M160GTX® now boasts of Supercruise optimizations to give it even more performance in low airflow/noise conditions while maintaining full compatibility with previous dual 80mm Black Ice® Micro form factor radiators.

Features

- 80 mm x 2 fan Xtreme Micro form factor dual-core radiator
- 178mm x 84mm x 54mm (L x W x H)
- 16 FPI 25 Micron Copper Fins
- Now optimized for sub-800 rpm ultra-stealth fans
- Supercruise optimizations for scalable performance with higher speed fans
- Increased internal coolant flow rates
- Standard G 1/4" inlet/outlet fittings
- Standard M4 mounting threads
- Compatible with Black Ice® GTX™ M160
- Custom Dark Matter™ high quality finish
- Fully ROHS Compliant
- 100% Made from conflict-free materials
- Industry standard Black Ice® quality
- Lifetime warranty against manufacturing defects*

* Limited warranty information: www.hardwarelabs.com/nemesis/warranty

** radiator shown with optional push fittings

Additional Information

Brand	Hardware Labs
SKU	N160GTX-F2PB
Weight	1.7000
Color	Black
Radiator Thickness	54mm
Vendor SKU/EAN	4806518484860

February 14th, 2015 HW Labs Black Ice Nemesis 360GTX Radiator Review

"The Hardware Labs Black Ice GTX Gen Two Xtreme 360 is a beautiful radiator. The gloss black finish was completely free of any desirable defects. All the solder joints looked flawless as well. There is no doubt that when looking at the GTX 360 that it is finely crafted. There is certainly nothing to complain about when it comes to the high speed fan testing though. Here we the Black Ice GTX 360 outperformed every one of our test units. If you need strong performance and do not mind pushing some higher RPM fans or are planning on using a push/pull fan arrangement, it is one of the best in the class." Read the Full Review [HERE](#).

December 7th, 2014 HW Labs Black Ice Nemesis 360GTX Radiator Review

"The 360GTX uses a two pass configuration, with brass tubes. Copper fins are 25 microns in a 16 fpi pattern. The resulting performance was very much what one would expect from such a setup given top quality execution. Low rpm performance was good, though not the best we have tested. However, as fans speeds were upped, the Nemesis 360GTX scaled nicely. Performance took a huge jump once the fans hit a relatively low 1100 rpm and kept getting better from there. With fans speeds over ~1200 rpm, the Nemesis 360GTX was the top performing 360mm rad we have tested to date." Read the Full Review [HERE](#).

October 23, 2014 The Quad Rad Roundup

"Performance should never be the sole metric to base a radiator choice on. In fact, never buy a radiator separately- get the radiator and appropriately chosen fans in terms of airflow, static pressure and noise levels you are comfortable with. "The HWL (Black Ice NEMESIS) rads scale great with airflow while the XSPC RX V3 does not- goes to show that liquid and air flow restrictions don't tell everything and the entire package can affect things. The Nemesis series was optimized for scaling and it has showed to be the case in here." -Varun S. Gangoli. Read the whole review [HERE](#).
