

# Aquatuning AT-Protect Coolant - UV Crystal Blue 5000ml

\$28.50

## Product Images

## Short Description

Ready to use coolant which can be poured into the cooling loop without further mixing or dilution. Specially developed for closed cooling loops, highly effective and long-term stable anticorrosive for PC cooling systems. Suitable for loops with multiple different materials (e.g. Copper, brass, Aluminum, plastics, gaskets).

## Description

Ready to use coolant which can be poured into the cooling loop without further mixing or dilution. Specially developed for closed cooling loops, highly effective and long-term stable anticorrosive for PC cooling systems. Suitable for loops with multiple different

materials (e.g. Copper, brass, Aluminum, plastics, gaskets). The corrosion inhibitors work effectively and protect your system over a long period of time.

Metering is easy, as AT-Protect is filled into the cooling loop undiluted and without further mixing. To ensure proper functionality of the coolant no additional dilution (e.g. with water) is permissible. AT-Protect is non-odorous, colourfast and non-flocking.

AT-Protect UV blue contains no Gylsantine or glycol and hence does not reduce the heat absorption of the water. It is hence perfect for use in high-performance water cooling systems.

## Features

---

- Low electrical conductivity
- Extra-pure distilled / de-ionized water with an electrical conductivity of  $1\mu\text{S}/\text{cm}$  is used in the production of this coolant
- Contains additives against algae and corrosion inhibitors
- Not aggressive against Acrylic, Acetal, rubber or other gasket materials
- Conforms with RoHS regulations

## Specifications

---

- Color: Blue
- Fluorescence: UV Blue
- Content: 5000ml

### **Warning:**

Contains Benzotriazol (non respirable). Keep out of the reach of children. In case of contact rinse immediately with plenty of water and seek medical advice.

Note: Manufacturing residues in radiators may lead to unwanted reactions, hence this product must be used with cleaned radiators.

## Additional Information

---

Brand	Aquatuning
SKU	AT-30280
Weight	11.0000
Color	UV Blue
Fluid Type	DI Water Based
Volume	5 liter
Vendor SKU/EAN	4049469174422
