Following the launch of the highly popular Rigid Compression Fittings, PrimoChill is adding a little spice to the fitting family with the new Revolver fitting line. If you are looking for the extra wow factor in your current or upcoming build, these are the fittings for you!

Description

Following the launch of the highly popular Rigid Compression Fittings, PrimoChill is adding a little spice to the fitting family with the new Revolver fitting line. If you are looking for the extra wow factor in your current or upcoming build, these are the fittings for you!

PrimoChill's goal was to provide the user the simplest possible method to install Rigid tubing into your system. The use of one oring and a meticulously designed nickel plated G 1/4 base fitting allows the user to install rigid tubing without the need of complex tools. With the addition of the Aluminum cap, a perfectly balanced amount of compression is applied to the rigid tube which prevents the cracking of fragile acrylic yet still provides enough pressure to eliminate the escape of fluid.

Note: Although aluminum is used for the outside anodized ring, no aluminum comes in direct contact with the fluid.

Features

- Lightweight, low profile.
- Nickel Coated Brass interior.
- Interior Compression O-ring.
- Bright Aluminum Color, or Nickel Plated Black and Silver.
- Patent Pending Design***

Additional Information

Brand	Primochill
SKU	F-RCDKGD3812-4-D
Weight	0.7500
Special Order	No
Fitting Type	Rigid Compression
Fitting Size	3/8" x 1/2"
Fitting Angle	Straight
Fitting Finish	Gold
Special Price	\$19.56
