Short Description

The Das Keyboard 4 mechanical keyboard experience is like no other. From the initial idea to every fine detail when crafting this machine, the experience we deliver to customers is what drives our team.

Description

The Das Keyboard 4 mechanical keyboard experience is like no other. From the initial idea to every fine detail when crafting this machine, the experience we deliver to customers is what drives our team.

The combination of tactile feel, the *psycho-acoustic* experience and *incredible craftsmanship* all deliver an unmatched typing experience that only Das Keyboard 4 offers. With a Das Keyboard 4, you'll type faster and longer. It feels so good, you won't want to stop.

Das Keyboard 4 Ultimate mechanical keyboard is a *completely blank keyboard* for bad ass typists and gaming enthusiasts. It's made of the highest-quality materials and has a *robust construction* you can feel. All of our keyboards are designed with high-performance, gold-plated mechanical key switches lasting up to 50 million keystrokes. When Germans design it, you know it has to be good.

Features

Cherry MX Switches

Das Keyboard uses best-in-class, Cherry MX mechanical key switches that provide *tactile and audio* feedback so accurate it allows you to execute every keystroke with *lightning-fast precision*. Its high-performance, *gold-plated* switches provide the best contact and typing experience because, unlike other metals, gold does not rust, increasing the lifespan of the switch. The Das Keyboard 4 Professional mechanical keyboard is available in both the Cherry MX Blue and Cherry MX Brown switches.

Force Diagram Clicky (Blue)

Force Diagram Soft (Brown)

Cherry MX Blue Switch (Clicky)

The Cherry MX Blue switches are the most popular switches for typing because they have a *“clicky” tactile bump* when the activation point is hit. This feedback helps to *increase typing speed* by reducing effort needed to push the keys all the way down. The Cherry MX Blue switch is the most *“clicky”* of the Das Keyboard line.

Cherry MX Brown Switch (Soft Tactile)

The Cherry MX Brown switches have a *soft, tactile bump* about halfway through the key press. The Soft Pressure Point switch technology makes the mechanical keyboard a little less clicky while still providing an *awesome tactile experience*.

Oversized Volume Knob & Dedicated Media Controls

With its large volume knob, Das Keyboard 4 allows users to *quickly adjust volume* while on a Skype call, in a Google hangout, or streaming online music. The Das Keyboard 4 also provides quick access to dedicated media controls such as mute, play, pause, next and previous track. A quick-access *instant sleep button* has been added to save energy while going to lunch or attending meetings.

USB 3.0 SuperSpeed Hub

Need to transfer videos to your workstation but don't have time to wait all day for file transfers to complete? Don't worry. Das Keyboard 4 has a blazing fast two-port USB 3.0 hub to transfer music, high resolution pictures and large videos at up to 5Gb per second. That's *10 times faster than USB 2.0*. It is backwards compatible with all USB 2.0/1.1 devices and hosts so previous peripheral investments are protected.

N-Key Rollover

Gamers and fast typists will love to hear that Das Keyboard 4 supports full n-key rollover (NKRO) over USB. *No need to use a PS2*

adapter anymore. Just press shift + mute to toggle NKRO.

Blank & Bad Ass

Type faster than you ever thought possible on one of these blank babies. The Das Keyboard 4 Ultimate is a *completely blank* keyboard for bad ass typists and gaming enthusiasts.

Footbar = Ruler

We got tired of those itty bitty plastic keyboard feet. They are fragile and typical. The *magnetically detachable* Das Keyboard footbar raises the keyboard to an optimal 4-degrees. It looks sharp and can be used as a *precise ruler* when not in use as a footbar. 16-Inch red ruler is scaled on both sides. A ruler? Why not...

Extra Long Cable

Das Keyboard 4 sports a 2-meter (6.5ft) cable that goes through desk grommets to *keep your workspace neat and tidy*. Now equipped with *only one USB cable* to power keyboard and USB hub at the same time.

Every Detail Matters

Featuring a stunning look, Das Keyboard 4 Professional has been completely redesigned with a *slick anodized aluminium top panel*, a resonance-free bottom enclosure, a magnetically attached footbar, and a *laser-engraved aluminium bottom label*... all which make the design feel more bad ass and the typing feel more responsive.

There is no detail too tiny for us.

Specifications
