Short Description

Alphacool's clear reservoir generation, straightforward yet truly stunning design and functionality

Show what you have in your system: An amazing watercooling system! These reservoirs are perfect to put it to display.

Description

Alphacool's clear reservoir generation, straightforward yet truly stunning design and functionality

Show what you have in your system: An amazing watercooling system! These reservoirs are perfect to put it to display.

The transparent front allows a direct view of the flowing coolant. Whether you choose the large reservoir for two 5.25" drive bays or the more compact model for one 5.25" drive bay you will always receive an exceptional product which will support your cooling concept.

The coolant is the lifeline of your cooling system and will be visible in the front of the case with this reservoir. The reservoirs even provide the possibility for integration of an individual lighting concept: The large reservoir has four and the smaller one three pre-drilled 5mm LED holes to put on an exceptional lightshow in your system. Two of the four LEDs in the larger reservoir and one of the three in the smaller one shine onto the separating Plexi plate in the middle of the reservoir to provide a more even light distribution, the other LEDs light up the coolant directly.

This reservoir will look truly great in the front of your case!

The design of the reservoir is also well thought through. The Plexi is extra strong and very thick which further aids the stability and durability of the reservoir. A separating plate is integrated in the middle of the reservoir to force the coolant to flow through the whole of the reservoir for better deaeration. The filling opening, sealed with a black nickel cross-slotted 3/8" screw plug, is integrated in the front third of the reservoir. By simply pulling out the reservoir the system can be filled. This process is made even easier when using a Fillport!

Mounting is done just like mounting of an optical drive, quick and easy!

Specifications

- Material: Plexiglas
- Colour: Transparent
- Connection thread size: 1/4"
- Filling opening thread size: 3/8"
- Dimensions (L x W x H): 175 x 150 x 87mm
- Four 5mm LED holes

Conforms with ROHS

Extent of delivery:

- 1x Alphacool Repack Dual Bayres 5,25" Clear Rev.2
- 4x Mounting screws
- 4x Washers

Please note: On items in this price category slight scratches on the surface cannot be avoided at all times for manufacturing

reasons. These may be reduced or even removed by polishing.

Important Note: Please note that the firm Alphacool International GmbH accepts no liability for damages of this product by using other coolants. We would like to point out that other coolants as inhibitors often contain alcohol or other corrosive substances attack the acetal, please only use our Cape Kelvin Catcher.

Additional Information

Brand	Alphacool
SKU	AC-15174
Weight	2.0000
Color	Clear
Reservoir Type	Dual-Bay Res
Vendor SKU/EAN	4250197151740
