Description

PrimoChill Rigid Ghost Compression Fittings are finally here after months of R & D and testing! PrimoChill's goal was to provide the user the simplest possible method to install Rigid tubing into your system. The use of one oring and a meticulously designed nickel plated G 1/4 base fitting allows the user to install rigid tubing without the need of complex tools. With the addition of the Aluminum cap, a perfectly balanced amount of compression is applied to the rigid tube which prevents the cracking of fragile acrylic yet still provides enough pressure to eliminate the escape of fluid.

Features

- Connect Rigid tubes to any Male G 1/4 Fitting or Cap.
- Lightweight, low profile.
- Easily go from to Flex tubing to Rigid.
- Nickel Coated Brass interior.
- Interior Compression O-ring.
- Bright Aluminum Color, or Nickel Plated Black and Silver
- Patent Pending Design

Additional Information

Brand	Primochill
SKU	F-RCCGKO3812-D
Weight	0.2000
Special Order	No
Fitting Type	Rigid Compression
Fitting Size	3/8" x 1/2"
Fitting Angle	Straight
Fitting Finish	Orange
Special Price	\$6.96
