Short Description

EK-CoolStream WE is a high-performance computer water-cooling radiator which combines EK's unique CSQ design with latest radiator core engine. Built for 180mm fans, these radiators are optimized for maximum heat dissipation across entire fan operational range thus delivering exceptional performance at both low- and high airflow operation..

Description

EK-CoolStream WE is a high-performance computer water-cooling radiator which combines EK's unique CSQ design with latest radiator core engine. Built for 180mm fans, these radiators are optimized for maximum heat dissipation across entire fan operational range thus delivering exceptional performance at both low- and high airflow operation.

EK assured quality level, optimal price-performance ratio and unique minimalistic design make these EK-CoolStream WE series radiators a perfect choice for any computer water cooled system.

This radiator offers best cooling capacity in the 35mm thick radiator class: Double stack copper fins provide massive surface area while the parallel flow cooling chambers reduce hydraulic flow resistance to a minimum. Radiator shrouds are tapped with UNC 6-32 threads on both sides to enable push-pull fan installation to even further increase the cooling performance.

This product features two recessed G1/4 threaded ports to allow any G1/4 threaded fitting to be used. EK recommends EK-CSQ series compression fittings.

Additional Information

Brand	EK Waterblocks
SKU	EK-RADWE360
Weight	5.0000
Color	Black
Radiator Size	180mm Dual
Radiator Thickness	35mm
Vendor SKU/EAN	3831109860342
