

WATERCOOL

Watercooler Passive Cooler for VGA RAM Heatsinks (12 Pack)

\$12.95

Product Images

Short Description

This set includes 12 passive heatsink for the RAM chips of current graphics cards. The coolers are 5mm high and have a fin shape, which increases the surface area. They are made of black anodized aluminum. For easy mounting on both sides self-adhesive thermal pads are included in industrial quality in delivery.

Description

This set includes 12 passive heatsink for the RAM chips of current graphics cards. The coolers are 5mm high and have a fin shape, which increases the surface area. They are made of black anodized aluminum. For easy mounting on both sides self-adhesive thermal pads are included in industrial quality in delivery.

The coolers are intended only for use on VGA RAM chips. A use on other components, such as GPU or voltage transformers can damage hardware beyond repair and are generally at your own risk!

Please note that all traces of adhesive, thermal interfaces or the like before use is removed from the RAM chips. If this is not observed, the adhesive strength and / or duration of adhesion may be impaired and drop the radiator in operation!

Ideal for use with the HEATKILLER® GPU X³ Core series.
