## Product Images

## Short Description

---

The Argon series coolers are designed to provide the best cooling solutions for your CPU. The Argon AR06, at 58mm high including fan, features four 6mm thick copper heat pipes connect to the base using heat-pipe direct contact (HDC) technology. A highly efficient 92mm PWM fan tuned for optimal balance of airflow and noise is included to provide up to 95W of cooling power (or more in case with efficient airflow). For users requiring enhanced performance in space constrained applications, the high quality and affordable AR06 is a great choice.
