

EK-TIM Ectotherm Thermal Paste (5g)

\$5.99

Product Images

Short Description

EK-TIM Ectotherm is a best in-class thermal compound with exceptional value for money. This thermal interface material provides an effective heat transfer and easy application between CPU, GPU or any other PCH/chipset and heat sink.

Description

EK-TIM Ectotherm is a best in-class thermal compound with exceptional value for money. This thermal interface material provides an effective heat transfer and easy application between CPU, GPU or any other

PCH/chipset and heat sink.

Ectotherm has been bundled with EK Full Cover water blocks since early 2013 and has been deployed by various system integrators as a cost effective, yet high performance thermal compound.

This Low Viscosity and Electrically Non-Conductive thermal compound makes each application trouble-free and failsafe.

EK-TIM Ectotherm comes in a practical five grams (5g) packaging within a reusable gift-box and is thus a perfect choice for passionate computer modders, overclockers and computer repair shop personel.

Specifications

Technical specifications:

- Density (g/cm³): 3.0
- Net Content (g): 5.0
- Thermal conductivity (W/mK): 8.5
- Optimal working temperature (°C): +100 to -50

Made in China for EK Water Blocks.

Additional Information

	No
	AMD, Intel
	AMD Radeon, Nvidia GeForce

Additional Information

Brand	EK Waterblocks
SKU	EK-TIM-ECTO-5
Weight	0.0100
Vendor SKU/EAN	3830046998453
