

HARDWARE LABS

Hardware Labs Black Ice Mount Screws M4 x 5mm Black (Set of 4)

\$0.99

Product Images

Short Description

With Hardware Labs' new M4 x 5 screws you can now mount your rad directly to the case without the need of looking for some exotic-sized screws elsewhere. They look good, painted black, with a slight domed Phillips-head screw drive on it. It will blend in to the background, which is exactly what you will generally desire with assembly hardware. Get yourself some screws, and get back to work on that project!
