Short Description

EK-HFB Fitting (High Flow Barb) is a soft-tube barb fitting, designed for use with flexible soft tubing such as PVC, EPDM, Norprene, silicone or any other type of compatible flexible tube.

Description

EK-HFB Fitting (*High Flow Barb*) is a soft-tube barb fitting, designed for use with flexible soft tubing such as PVC, EPDM, Norprene, silicone or any other type of compatible flexible tube.

EK-HFB Fitting is a stylish looking variant of the classic high flow barb fitting and requires the use of hose clamps or similiar substitute for safest operation.

The barb is made from nickel-plated CNC machined brass with quality O-rings while the ring is made from CNC machined aluminium. These fittings are fully compatible with EK-AF series (45°/90°) angled adapters.

These fittings can be either tightened by hand or by using [Allen Key 9mm](#) (not included, available for separate purchase).

Specifications
