Short Description

System builds no doubt always involve many cables that just do not seem to stay neat and organized. Enter CableMod Cable Combs. These little gems will easily clip onto your PSU cables and space each wire perfectly so the system looks professionally built and organized. A new rig is just not complete unless wire management is under control and with the CableMod combs you are one easy step to solving this problem!

Description

System builds no doubt always involve many cables that just do not seem to stay neat and organized. Enter CableMod Cable Combs. These little gems will easily clip onto your PSU cables and space each wire perfectly so the system looks professionally built and organized. A new rig is just not complete unless wire management is under control and with the CableMod combs you are one easy step to solving this problem!

CableMod offers cable comb sizes for their new popular PSU replacement sets, There are slot sizes made for every cable in the kit. **Please note that there are THREE sizes. Choose correctly using guideline list below, Sizes A, B and C!**

****ATTENTION! CableMod® brand PRO ModMesh Series cable sets have their own special combs provided in the packages. NONE of the existing CableMod® cable combs are compatible with these new cable sets, so please keep that in mind when ordering the PRO ModMesh Series cables. We cannot be held responsible if you order combs erroneously, attempt to install them, and end up breaking them on these new cable sets.****
