Description

High Purity Deionized Water with no chemicals or additives creates an excellent starting point to develop your coolant. If you are a DIY geek looking for an affordable High Purity Deionized Water, Pre-dyed base, the ONLY solution is PC Base Intensified™.

Need some color?

PC Base Intensified™ has been updated with our new Intensifier™ line of water-based dyes, to give you the most intense looking and glowing coolant on the market today. This fluid product line is for the Do It Yourself-er looking to make their own coolant but in need of a solid foundation to build it from.

Features

- A Great Base for any coolant project.
- Ready for you to make your own coolant. (Add color if you wish!)
- Multi-Filtered, Polished water source bottled direct to you.
- Designed for the user that wants to use their own crazy voodoo additives.
- Just as safe as water on all plastics, rubbers, and miscellaneous gasket materials, including Acrylic.
- Does not include any special inhibiting ingredients to prevent sludge build up like algae (anti-microbial additive) and galvanic corrosion (corrosion inhibitor).
- 2 year shelf life (unopened in original Bottle)

Specifications

- Bottle Sizes: 32 fluid ounces (approximately 1 liter) , or 128 fluid ounces (Clear Only)
- Warranty: 90 days
- Add your own inhibitors and additives. (Not Included)
- High Purity Deionized Water

Warnings/Cautions:

As with all cooling fluids, PC Base Intensified™ can become conductive if it comes in contact with dust or other fluids that may be conductive. Proper maintenance is needed with any and all cooling fluids. It is always a good idea to keep your system clean and free of dust, especially in a water cooled system. PrimoChill is not responsible for any hardware damage. Use at your own risk.
