

Aquacomputer Kryoconnect Kit for Kryographics with Active Back Plates, Width 4 Slots for 2 Graphics Cards

\$19.95

Product Images

Short Description

The kryoconnect direct connection kit allows to directly connect two graphics card waterblocks (kryographics series) with active back plates and can be used for SLI or Crossfire systems.

The kit comes with a connection block made of Delrin which replaces the connection blocks of the individual water blocks. The graphics card must have a spacing of three slots (meaning two slots remains unused between the graphics cards). Please refer to article no. 23574 for two slot spacing/one unused slot between the graphics cards! A sealing screw is also supplied and can be used to determine whether the waterblocks are connected in parallel or in series.

Description

The kryoconnect direct connection kit allows to directly connect two graphics card waterblocks (kryographics series) with active back plates and can be used for SLI or Crossfire systems.

The kit comes with a connection block made of Delrin which replaces the connection blocks of the individual water blocks. The graphics card must have a spacing of three slots (meaning two slots remains unused between the graphics cards). Please refer to article no. 23574 for two slot spacing/one unused slot between the graphics cards! A sealing screw is also supplied and can be used to determine whether the waterblocks are connected in parallel or in series.

Specifications

Suitable for the following waterblocks:

kryographics for GTX Titan

kryographics for GTX 780

kryographics Hawaii Radeon R9 290X

Suitable for motherboards with two unused slots between the PCIe slots for graphics cards.

Scope of delivery:

1 connection block made of Delrin

1 sealing screws

Please note:

Water blocks, back plates, graphics cards and fittings are not included in delivery, please order separately.

Threads are G 1/4. SLI/Crossfire operation is also possible without this conversion kit using bent fittings.

This set cannot be installed without active back plates, for configurations without back plates please refer to articles 17196, 17197 or 17198!

Additional Information

Brand	Aquacomputer
SKU	AQ-23575
Weight	0.4000
Color	Black
Vga	Various Newer Nvidia/AMD
Block GPU Type	Nvidia/AMD
Block Accessory Type	SLI Bridge
Material	Delrin (POM)
Vendor SKU/EAN	4260073417143
