## Short Description

---

Ever wanted to customize your own cable extensions to match your unique build? Now you can with CableMod ModFlex™ Sleeved Wires.

## Description

---

Ever wanted to customize your own cable extensions to match your unique build? Now you can with CableMod ModFlex™ Sleeved Wires.

These sleeved wires feature the very same ModFlex sleeving featured on our premium cable kits for a luxurious look and supreme flexibility. No heatshrink ensures a clean look, and each and every wire is precision cut to the same exact length for optimal results.

Assembling your own custom cable extension is easy and tool-free. The ends of each wire are fitted with a color-coded silicone protector. Simply remove the protector, match that color with the color code on our CableMod Connectors, and insert the wire - it's really that easy.

Available in a multitude of colors and lengths, the only limit to what you can do with ModFlex Sleeved Wires is your own imagination.
