## Short Description

---

With the new GPX NexXxoS coolers Alphacool is again one step ahead! Optimum performance and quality in a, this new cooling concept for little money!

## Description

---

With the new GPX NexXxoS coolers Alphacool is again one step ahead! Optimum performance and quality in a, this new cooling concept for little money!

Function: A new sophisticated injection technology, the GPU is actively cooled. All other chips are sufficiently cooled by the passive radiator in which the water cooler for the GPU is framed.

Phillips structure: As for the Alpha NexXxoS XP in 2004 patented Phillips technology in the base plate has been further developed. The Finns and channel structure has been further refined. The remaining tiller are 0.5 x 0.5mm in size and 2.5mm high. This allows for very large and rapid heat transfer from the copper to the cooling medium.

SLI operation: The inlet and outlet outward these coolers can be used without great effort in SLI mode. Up to four graphics cards can also be connected to the Alphacool GPX SLI connector. (Available soon)

Backplate: now also belongs to the delivery always a backplate that again with small passive cooling fins cools the graphics card, the graphics card gives a perfect impression while protecting.

Fins: The passive cooling via perfectly matched, almost 18mm deep cooling fins that cover the rest of the graphics card completely. A slight airflow in the case of this cooler is according to conventional coolers in nothing.

## Additional Information

---

Brand	Alphacool
SKU	AC-11234-D
Weight	1.5000
Color	Black
Vga	AMD R9 270X (Non Reference)
Block GPU Type	AMD
Vendor SKU/EAN	4250197112345
Special Price	\$9.99
